THE SHOOT™

The Shoot is a patented, effective way to insulate open framed areas in new construction applications for residential and commercial buildings, as well as room additions and remodeling projects.

The 16" OC size is conveniently scored to assist in alterations for odd sized openings. The Shoot is regularly used in common wall and knee wall applications and is the perfect tool for the insulation industry, spray foam applications, spray-on and blow-in blanket systems.

When compared to traditional ways of creating insulation spray backing, The Shoot can save hours of labor. Pieces are easily cut with a standard utility knife, fit quickly into place and can be stapled to framework for stability for on-site efficiency without wasted prep time.

STANDARD SIZES:

16" x 72"

24" x 72"

- Attic Knee Walls
- Garage Common Walls
- Soffit Blocking
- Floors and Ceilings
- Under Metal Roofing and Siding
