VIPER® VAPORSCRIM

Viper VaporScrim is a multi-use, polyethylene vapor retarder that incorporates a high strength reinforcing layer for use in applications requiring a highly durable yet lightweight material.

Applications include construction enclosures, temporary liners and covers, insulation membranes, shipping and packaging, asbestos abatements, fumigation covers, temporary walls/curtains, remediation covers and vapor retarders.

Viper VaporScrim is a triple-ply scrim reinforced LDPE vapor retarder. The high strength scrim reinforcing layer is designed to enhance the strength characteristics of the film in order to prevent tears and punctures from rigorous construction environments.

12-MIL
20 x 100', 24 x 100', 32 x 100', 40 x 100'

10-MIL
20 x 100', 24 x 100', 32 x 100', 40 x 100'

6-MIL
20 x 100', 24 x 100', 32 x 100', 40 x 100'

- High Strength Reinforced Layer
- Poly Bonded To Prevent Delamination
- Inhibits Moisture & Vapor Transmission
- Lightweight, Easy Installation
- Wide Rolls For Minimal Seams
- Reusable
